DETAILED ACTION

Receipt is acknowledged of the papers filed 7/18/2006 in which claim 25 was amended and claims 18 and 21 were cancelled. Claims 1, 6, 8-17 and 24-26 are pending in the instant application.

This application is in condition for allowance except for the following formal matters:

Specification

The disclosure is objected to because of the following informalities: the specification makes numerous references to Figures 4a-4d and 5a-5d, yet Figures 4 and 5 do not include panels a-d. Also, Figures 4 and 5 comprise amino acid sequences that are not referred to in the Brief Description of the Drawings section of the disclosure. Corrections can be made either to the drawings and to the specification such that replacement drawings are submitted with identified panels a-d and the specification is amended to refer to such panels in the Brief Description of the Drawings section; or Applicant may amend only the specification in order to make clear which sequence is referred to at each instance by changing, for

example, a reference to Figure 4a to read: Figure 4, first sequence. However, it is noted that Figures 4 and 5 actually contain 6 sequences each: 4 nucleotide sequences and 2 amino acid sequences. Any reference to a first, second, third or fourth sequence should clearly indicate which sequence is intended.

Appropriate correction is required.

Sequence Compliance

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 because sequences are set forth in the specification and drawings that lack sequence identifiers. Specifically, the amino acid sequences present in Figures 4 and 5 lack sequence identification numbers. The sequences present on lines 19-20 of page 13 and on lines 3-4 and 9 of page 23 also lack sequence identifiers. It is often convenient to identify sequences in figures by amending the Brief Description of the Drawings section (see MPEP 244.02). If the sequences are already present in the sequence listing, it would be remedial to amend the Brief Description of the Drawings to include the

appropriate sequence identifiers. Applicants are required to comply with all of the requirements of 37 CFR 1.821 - 1.825. Any response to this Office action that fails to meet all of these requirements will be considered non-responsive. The nature of the noncompliance with the requirements of 37 C.F. R. 1.821 through 1.825 did not preclude the examination of the application on the merits, the results of which are communicated below.

Conclusion

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire TWO MONTHS from the mailing date of this letter.
